

Sections 107/120

GSI name: Chan Bae

240830

Homework/Quizzes

Homework should be submitted via gradescope. You can add yourself to my gradescope with the entry code G37JVZ.

Quizzes will be in section every two weeks on Wednesday. The first quiz will be in two weeks (Sep 11th). The quizzes will try to focus on material from the previous two weeks, but everything you should have learned at some point (e.g. trig identities) is fair game.

Attendance

I will not take attendance because I ~~never went to class and I turned out fine~~ strongly believe that you should be able to set your own priorities.

Unfortunately, you will have to show up every two weeks for the quizzes, I don't really see a way around this.

Misc.

My office hours are on Wednesdays 12-2pm, Evans 1049. You can also go to any other GSI's office hours. Email me at c_h_bae@berkeley.edu if you have to see me and this time doesn't work.

Multivariable Calculus

Problem 10.2.2
